

# WRITING TASK 1

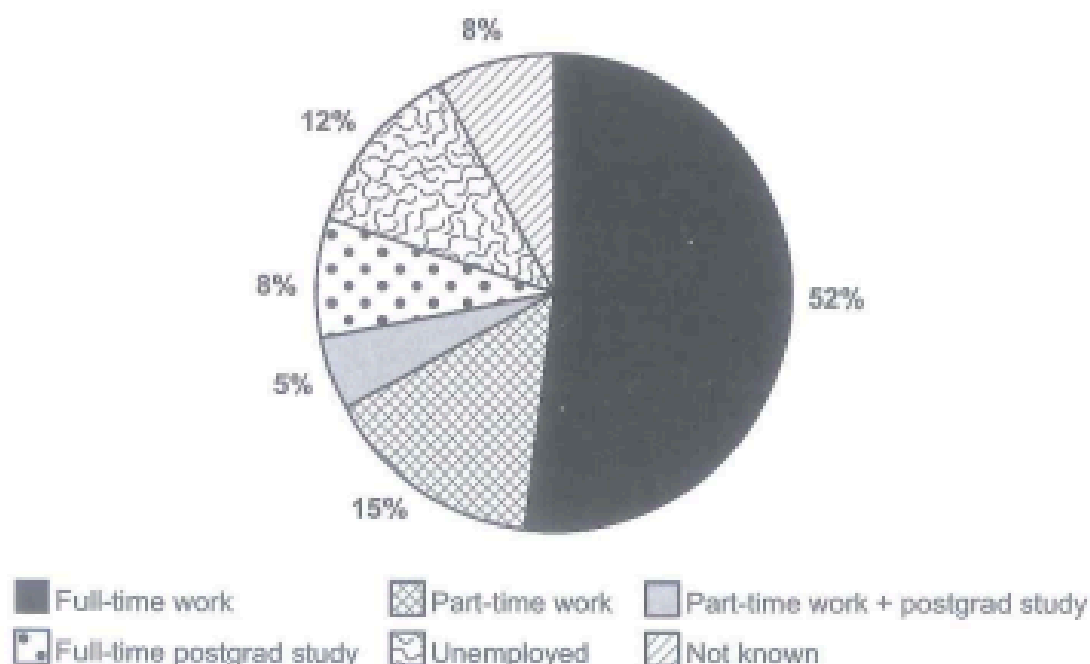

You should spend about 20 minutes on this task.

*The chart below shows what Anthropology graduates from one university did after finishing their undergraduate degree course. The table shows the salaries of the anthropologists in work after five years.*

*Summarise the information by selecting and reporting the main features, and make comparisons where relevant.*

Write at least 150 words.

**Destination of Anthropology graduates (from one university)**

**Salaries of Anthropology graduates (after 5 years' work)**

Type of employment	\$25,000–49,999	\$50,000–74,999	\$75,000–99,999	\$100,000+
Freelance consultants	5%	15%	40%	40%
Government sector	5%	15%	30%	50%
Private companies	10%	35%	25%	30%

The pie chart depicts what Anthropology graduates from a university did after completing the course of their bachelor's degree, and the table illustrates the wages of their jobs after half a decade.

Overall, the majority of the graduates are involved in full-time work while only the smallest proportions are doing part-time work along with their postgrad studies. In addition, most of the graduates working as Freelance consultants and in the Government sector are earning at the higher end of the salary range, but those doing jobs in private companies have wages in the middle range.

To begin with, slightly over half of the graduates have full-time employment while nearly one-fifth of them occupy a part-time position. Only 5% of graduates do part-time work and postgrad study and about 3% more are fully engrossed in Full-time postgrad education. Additionally, the information on an identical percentage of graduates is unknown. Lastly, a little over one-tenth of the graduates are unemployed.

With regards to the salaries, a staggering 40% of Freelance consultants and half of the Government workers earn over a hundred thousand dollars while those working in private companies earning a similar amount make up only 30%. Similarly, another 40% of Freelance Consultants make between 75 thousand and ninety-nine thousand. Government workers earning a similar amount make up 30% whereas those in the private sector make up a quarter of the total private workers. In the 50-75 thousand dollar range, however, the greatest proportion of private workers is observed at 35% meanwhile those from the Freelance consultants and Government sector are both at 15%. Finally, for the lowest salary range, only 5% of both Freelance and Government employees occupy it but 10% of private firm personnel are in this range.
